Pravega’24 : Robotics Challenge

The ARTPARK-Pravega Robotics Challenge attracted over 30 teams from across the nation, showcasing their robotics expertise. **Three finalists advanced to the final round held at the IISc campus from 25th to 30th January 2024.**

The preliminary problem statement, set by Dr. Josephine Ruth and Dr. Ravi Teja, focused on designing an efficient Autonomous Mobile Robot (AMR) fleet management algorithm and demonstrating it in a simulated environment (using Gazebo, etc.). In the finals, teams demonstrated ROS-compliant AMR fleet management algorithms in dynamic environments with obstacles, including humans, and navigating narrow corners.

Dr. Ravi Teja judged the finals, while Dr. Sanjeev Shrivastava honored the winners during the prize distribution ceremony.

Winners:

- **Winner:** Team Dark Matter from VIT Bhopal (Team leader: Jayesh Somani) - Rs. 20,000/-
- **Runner-Up:** Team Whizzers from Parala Maharaja College, Behrampur, Orissa (Team leader: Aman Patra) - Rs. 10,000/-
